

People Counting: Occupancy Overview

Introduction

Occupancy Overview provides visibility into overcapacity incidents, occupancy trends, and key metrics such as average occupancy, total occupancy, and hourly occupancy breakdown across a zone.

Clicking a zone opens [People Counting: Occupancy Details](#), providing detailed occupancy information.

Metrics & Charts

Metrics and charts available to users include:

- Live Occupancy,
- Occupancy Settings,
- Arrival & Departure Locations,
- Occupancy Trend,
- Over-Capacity Incidents,
- Hourly Breakdown

These metrics and charts help organisations visualise organisation-wide occupancy, including occupancy trends, over-capacity incidents, and the busiest arrival or departure locations to support auditing and operational awareness.
